About Me

I'm a second-year Computer Science student at Presidency University with strong skills in Java, C, and full-stack development. I've built impactful projects in AI and cybersecurity, including an AI legal chatbot and a city-policing support app.

I bring a solid foundation in coding, problem-solving, and a passion for using tech to drive real-world innovation.

KEY COMPETENCIES

- **Programming Languages** : Java , Advanced java , Python , C , HTML , CSS
- **Tools and Technologies** : GIT, VS Code, IntelliJ IDE, GitHub Actions and Canva.
- **Tech Stacks and Frameworks** : My SQL, Figma, R Studio.
- **Others** :API Automation, AI Testing, Test Plans, Test Cases, Agile Methodologies, Scrum Methodologies, Defect Tracking and Management.

PROFESSTIONAL EXPERIENCE

INTERNEP |

Java Developer

2024 - (July - April)

- Developed and optimized Java-based applications using object-oriented programming, improving system performance and learning real-world coding standards in a collaborative developed environment.
- Worked with tools like Git, MySQL, and IntelliJ IDEA to debug, test, and deploy scalable solutions—gained hands-on experience in backend logic, database connectivity, and version control.
- Contributed to agile team sprints, participated in code reviews, and implemented new features that enhanced app functionality—strengthening both technical and teamwork skills.

SOFTWARE VOTING SYSTEM

- > Designed and developed an online voting system using python, HTML, and CSS to provide To Ensure Voting Security and Integrity , To Support Small Elections or polls , To Allow Easy Vote Counting
- > Only registered users can vote , One vote per user is enforced , Passwords are securely stored using hashing (SHA-256).

WATER TURBIDITY AND WATER LEAKAGE DETECTION

- > Created water turbidity detection and water leakage detection , using Arduino and raspberry pi by using python as well as java programming language
- > which aims to Water Quality Monitoring in Treatment Plants , Industrial Waste Management , Offices and Commercial Buildings , Smart Buildings (IoT Integration) , Water Tanks or Pipelines

IMAGE SLIDER

- > The Image Slider Project is a simple web-based feature that lets users view multiple images by sliding through them manually or automatically .
- > i have used HTML, CSS (for layout and transitions), and JavaScript (for slide navigation and animation) to create a smooth, interactive experience.

CATERING RESERVATION AND ORDERING SYSTEM

- we have used ,
- > Reservation Form – Collects user details, event type, date, and guest count.
- > Food Ordering Section – Lets users choose multiple food items with quantities
- > Payment Method Selection – Options like Cash, UPI, or Card.

TEACHER STUDENT BOOKING APPOINTMENT

- >The Teacher-Student Booking Appointment System lets students schedule meetings with teachers by selecting a teacher, date, and time slot.
- > It uses HTML, CSS, and JavaScript to create a responsive form and show a confirmation popup with booking details

EXPERIENCE

• UNIFIED MENTOR PRIVATE LIMITED

EDUCATION

Bachelor of Technology 2023-27

Majors: Computer Science and Engineering
Presidency University, Bengaluru

SENIOR SECONDARY 2021-23

Majors: PACE UM PU COLLEGE

PU College, SHIVAMOGGA
Percentage – 91.5%

HIGHER SECONDARY 2018-21

SHARADHA RESIDENTIAL SCHOOL
Percentage – 90.36

CERTIFICATIONS

Certification Of Excellence
Python

Java Programming
Great Learning
Certification Of Distinction
pre university education

Certification Of Completion
[be10x AI Tools and ChatGPT]

Certification Of Completion In Generative AI
What is Generative AI
Ethics in Generative AI
